Acceptable Use Policy (AUP)

1. Purpose

This policy defines permitted and prohibited use of the Autonomous HRO Agentic Platform by Client and its authorised users. It forms part of the Agreement and is available in-product at [URL].

2. Permitted Use

Use of the platform for the Client's internal HR operations: employee queries, case submission and tracking, document requests, policy questions, and approved administrative workflows, by authorised users within licensed headcount.

3. Prohibited Use

Users must NOT: (a) attempt to extract, jailbreak, or manipulate the underlying AI models or system prompts; (b) submit content that is unlawful, discriminatory, or harassing; (c) probe, scan, or test the vulnerability of the platform without written authorisation; (d) use outputs to make automated employment decisions without the human review required by the platform design; (e) scrape, bulk-export, or resell platform content; (f) share credentials or circumvent access controls; (g) upload malware or infringing material; (h) exceed fair-use limits by automated means. [ADD CLIENT-SPECIFIC RESTRICTIONS].

4. AI-Specific Rules

AI responses are assistance, not advice; consequential actions (payroll changes, contract generation) require the human approval steps built into the platform and must not be bypassed. Users must not represent AI output as human-authored professional advice.

5. Enforcement

Provider may suspend accounts or throttle usage for violations, with notice to [CLIENT ADMIN CONTACT] except where immediate action is required. Repeated or material violations are handled under the MSA termination provisions.

6. Reporting

Report suspected misuse to [ABUSE CONTACT EMAIL]. Version: [X.Y] — Last updated: [DATE].

This template is provided for drafting convenience only and does not constitute legal advice. Obtain review from qualified counsel in each applicable jurisdiction before use.
