AI Transparency Notice

1. You Are Interacting With AI

The Autonomous HRO Agentic Platform assistant is an artificial-intelligence system. It is disclosed as AI at the start of each conversation and in the interface at all times, in accordance with [EU AI ACT ART. 50 / APPLICABLE LAW].

2. What the AI Does

Understands your request, retrieves your employer's HR policies, executes approved HR workflows, and drafts responses grounded in policy documents with citations. Flow classes: instant answers, policy Q&A, multi-step cases, and complex cases.

3. Where Humans Are Involved

Consequential actions — payroll corrections, contractual changes, exceptions to policy — always require review and approval by a human HR professional before execution. You may request a human at any time by [MECHANISM, e.g. typing "talk to a person"].

4. Limitations

The assistant can make mistakes, may not reflect the very latest policy changes before its knowledge is refreshed ([REFRESH CADENCE]), and does not provide legal, tax, or financial advice. Verify consequential information via the cited policy or a human agent.

5. Automated Decision-Making

[STATE POSITION: e.g. The platform does not make legally significant decisions about you solely by automated means; all such decisions include human review, consistent with GDPR Art. 22.]

6. Contact & Version

Questions: [CONTACT]. Version [X.Y] — Last updated [DATE].

This template is provided for drafting convenience only and does not constitute legal advice. Obtain review from qualified counsel in each applicable jurisdiction before use.
